CS157A Project Intermediate Demo

Instructor: Dr. Kim

1. You are required to present in every demo session regardless your team presents on that day or not. (I will record the participation.) For this, a signup sheet will be available for you to sign up.
2. Each team will have a 10 minute time slot including time for question and answer. Since presentations will be scheduled back-to-back, I expect you start the presentation immediately without any delay to set up the computer.
3. Every member should take a part in the presentation.
4. What to do
    - Make a presentation using the power point slides you posted on the goole doc. (It is ok to use the slides stored in your laptop.)
    - Demo: You are required to demonstrate at least three different user requests can be taken to the the running Java application and then be served successfully.
5. **Do not expose your team name during the presentation.** The presentation should go by names of team members.
